

**NATIONAL INSTITUTE OF TECHNOLOGY**  
**WARANGAL**

**Department of Computer Science and Engineering**

**DBMS PROJECT - I**

**Participant Details:**

1. Prayanshu Agarwal  
Roll No: 197162  
Sec : CSE-A
2. Harendra Bangra  
Roll No : 197231  
Sec : CSE-B
3. Rahul Kumar Mishra  
Roll No : 197176  
Sec : CSE-A

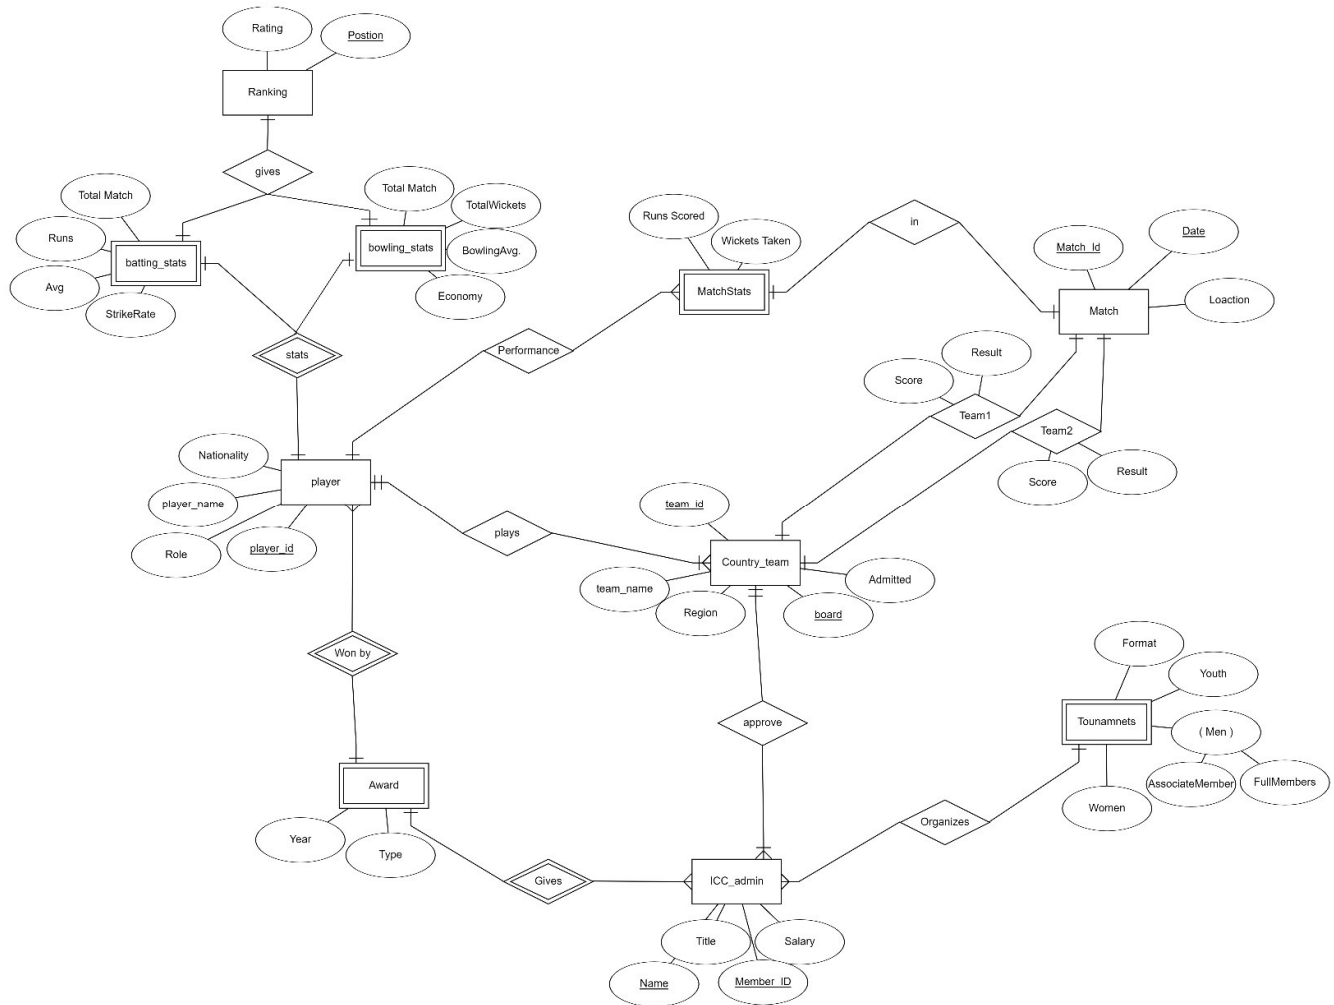

## **Problem Statement:**

**The database design of International Cricket Council(ICC)**

**The key points of database are as follows:**

- 1. All the approvals and the activities are being headed by the admin of the ICC named as ICCadmin.**
- 2. Match and country team has many to many relationship so any no of teams can participate in a tournament.**
- 3. A player will play for single country only.**
- 4. Ranking will be given on the basis of stats.**
- 5. Each player has its own bowling and batting stats no matter how big or small the data is.**
- 6. Awards will be given by the admin.**
- 7. Match stats will store stats of all players played in particular match of both the teams.**
- 8. Format of all matches is same.**
